# Exela Technologies Announces the Launch of Exela Smart Office

abr 01, 2019

*Company introduces its Internet of Things for the workplace*

**IRVING, Texas, April 1, 2019** -- Exela Technologies, Inc. ("Exela") (NASDAQ: XELA), a location-agnostic global business process automation leader ("BPA") across numerous industries, today announced the launch of Exela Smart Office ("Smart Office"). Created to satisfy increasing customer demand for automation through its integrated technology products, Smart Office represents the next wave in workplace optimization.

[Smart Office](#) creates an Internet of Things ("IoT") for the office, interconnecting previously disconnected technologies to better suit the modern office environment. The offering can transform the front office, energy and facilities management, logistics and fulfillment, and provides on-demand services with connected devices to facilitate green initiatives and reduce waste. The solutions included in Smart Office are supported by a single sign-on capability, help accelerate visitor registration, and increase visibility into workflows and compliance. When used in concert, customers will experience end-to-end chain of custody and logistical benefits in shipping and receiving, fulfillment, recycling, and asset tracking, all of which integrate with Exela's proprietary Intelligent Lockers.

"Functioning as an interconnected, integrated suite of products, Smart Office can help simplify business processes and provide the visibility needed to optimize full-service operations," said Mark Fairchild, President, Exela Smart Office.
