

Exela Technologies Completes \$40 Million Divestment of SourceHOV Tax as Part of Strategic Plan to Sell Non-Core Business Assets

März 17, 2020

IRVING, Texas, March 17, 2020 (GLOBE NEWSWIRE) -- [Exela Technologies, Inc.](#) ("Exela" or the "Company") (NASDAQ: XELA), a location-agnostic global business process automation (BPA) leader across numerous industries, today announced that it has completed the divestment of its tax consulting group, [SourceHOV Tax](#), for a purchase price of \$40 million to Private Equity firm Gainline Capital Partners. Raymond James & Associates, Inc. served as the exclusive financial advisor to Exela.

This is the first strategic divestment of non-core business units for Exela as part of its previously announced initiative, and follows a \$160 million accounts receivable securitization facility that closed in January. While SourceHOV Tax's trusted services continue to play important roles in meeting the needs of CPA firms, corporations and other organizations, they are no longer core to Exela's global long-term strategy. This divestment enables the Company to further focus on its key business areas by streamlining its portfolio holdings, while at the same time increasing its financial flexibility.

"We are excited to have successfully completed this divestment, which instantly increases our liquidity and diversifies our funding capabilities as key part of our strategic plan shared in Q3 2019," said Ronald Cogburn, Chief Executive Officer of Exela. "This milestone not only improves our balance sheet in the near term, but also further enables the company to focus on its core business where we are best positioned for sustained long-term growth. With this transaction, we are becoming even better positioned to serve our customers by optimizing Exela's business portfolio and focus."

For more than three decades SourceHOV Tax has helped CPA firms and their clients maximize specialized federal and state tax incentives. The company collaborates with accounting firms throughout the country to bring R&D tax credits, cost segregation, §179D, LIFO, §199, Fixed Asset Review, and §45L solutions to their clients. With a team of 70 professionals and offices throughout the country, SourceHOV Tax serves many of the nation's most prominent accounting firms, associations, and middle-market companies.

SourceHOV Tax generated \$20.7 million of revenue for the year ended December 31, 2019.

About Exela Technologies

Exela is a business process automation (BPA) leader, leveraging a global footprint and proprietary technology to provide digital transformation solutions enhancing quality, productivity, and end-user experience.
